### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

While German document number DE 40 10 676 A1 shows an apparatus adapted for use on an oil well drilling rig for conveying non-free flowing drill cuttings comprising a pressure vessel that allows a compressed conveyance gas to be introduced therein as a means for inducing movement of the non-free flowing drill cuttings, the compressed conveyance gas is not the sole means for inducing movement of the non-free flowing drill cuttings because the vessel also utilizes a conveying screw. Furthermore, while the prior art such as Heyl et al. show pressure vessels that are adapted to allow a compressed conveyance gas to be introduced therein as the sole means for inducing movement of a bulk material, there is no suggestion that these vessels may be used for conveying non-free flowing drill cuttings on an oil well drilling rig. Therefore, because the preambles of the independent claims, when read in the context of the entire claims recite limitations of the claims and breathe life into the claims, the present invention is distinguished from this prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Deuble whose telephone number is (571) 272-6912. The examiner can normally be reached on Monday through Friday except for alternate Fridays.
